# Who we are

---

We are a couple who cherish life's small, everyday moments and celebrate the joy they bring. We believe that the things surrounding us from an early age shape who we become. We cherish beautiful objects and the memories they hold, because every piece tells a story—woven into life's small, precious moments: bedtime stories, first wobbly steps, laughter that fills a room.

Our designs honor these moments, becoming part of something far greater than themselves. Through our work, we hope to share this perspective and inspire others to embrace the beauty in life's little joys.
